

ROCK CLIMBING FLOOR INFO SHEET

Rock Climbing Flooring consists of 1-3/8" carpet bonded foam over 3-1/2" thick sheets of RG1875 polyfoam. Customer is responsible for cutting foam to size. Carpeted foam rolls must be ordered as complete 6' x 42' rolls. We do not sell new cut rolls of carpet bonded foam. Check the demo list on our website, we sometimes have great deals on short rolls. The polyfoam sheets are usually 5'x10' or 6'x12' depending on what size works best for the customers floor layout.

A typical order consists of a number of carpet bonded foam rolls, a number of sheets of 3-1/2" polyfoam and enough 4" wide hook connector to cover all of the seams of carpet bonded foam.

A typical installation has the customer cutting the polyfoam sheets around the sections of their climbing wall and floor. No gluing is necessary. Then the customer will cut the top carpet bonded foam rolls to also fit the area. Since there is no glue it is a good idea to avoid having a polyfoam seam directly under a seam in the carpet bonded foam if possible. Hook connector strips are then put down on the carpet bonded foam seams and the floor is complete. This can often be done in half a day, depending on the size of the facility.

WARRANTY NOTE: Although customer is most likely required to cut Carpet Bonded Foam Rolls to fit their application, the manufactures warranty is void if the rolls are altered.

IMPORTANT! WARRANTY ON CARPET BONDED FOAM ROLLS

Carpet Bonded Foam is covered by a limited warranty, however, if you alter or cut this product down from the original size the warranty is **VOID**. Manufacturer will not honor the replacement if product is altered in any way.

IMPORTANT CONSUMER PRODUCT HAZARD WARNING — PLEASE READ!
