

Layered Inground Pit System Cut-Away

Instead of filling your pit with a full size encased pit, try our Layered Inground Pit System. Our system features base layers of soft foam logs that channel and regulate airflow. The floor level layer is a self-contained 12" mat, also filled with soft polyfoam and covered with breather mesh fabric on top and bottom. Minimum pit depth is 24", deeper pits designed to your specification.

Our Layered In-Ground Pit Systems are custom made to your specs. Call (800) 779-1904 for all pricing.

⚠ IMPORTANT CONSUMER PRODUCT HAZARD WARNING — PLEASE READ!

A possibility of serious injury, including paralysis or death, is inherent in any activity involving motion or height. Equipment with which this notice is included is intended for use only by properly trained, qualified persons under supervised conditions. Use without proper supervision is dangerous and should not be undertaken or permitted. Know your limitations as well as the limitations of your equipment. Consult a qualified instructor before attempting any new activity or skill. This equipment must be used with proper mats, spotting equipment and qualified spotters for each activity or skill. Use this equipment only for its intended purpose. Do not modify equipment in any way. Inspect each component for damage, loose fittings or signs of wear before each use. Do not use if you have any concern as to the condition of this equipment. Test unit for stability prior to each use. Do not use if you have any concern about the stability, condition or suitability of this equipment. Inspect warning labels and replace when marred or damaged. Before each subsequent use, re-check equipment stability and settings.
